1 About this document

This documentation provides a guide for the different user cases on how each type of user can access the European Rare Disease Registry Infrastructure (ERDRI) and in particular its tools.

https://eu-rd-platform.jrc.ec.europa.eu/erdri-description

F.1 Health in Society

2 Aim of the system

The European Rare Disease Registry Infrastructure (ERDRI) is part of the EU RD the Platform. Through ERDRI RD patient data will become searchable and findable largely thanks to the informatics tools it provides. ERDRI's three main components are:

- **European Directory of Registries (ERDRI.dor):** ERDRI.dor provides an overview of the ERDRI participating registries with their main characteristics and description.
- **Central Metadata Repository (ERDRI.mdr):** ERDRI.mdr ensures semantic interoperability between RD registries. It has the task to store all definitions of used data elements (metadata) of the participating registries. Metadata describe the meaning of structured data elements.
- Pseudonymisation Tool: The Pseudonymisation tool is provided to all ERDRI participating registries

In this document access instructions to these components for each user case are provided.

3 User access and functions

Users can access different parts of ERDRI within the EU RD Platform according to the workflow outlined in figure 1.

F.1 Health in Society

Figure 2 shows the main access page is shown through which ERDRI can be accessed.

Figure 2. Accessing ERDRI through the main EU RD Platform page

The Terms of Use should be accepted by each user according to the screen below (figure 3).

European Commission > EU Science Hub > European Platform on Rare Disease Registration > ERDRI terms conditions

ERDRI terms and conditions

BY USING THE EU RD PLATFORM, YOU ("THE USER") AGREE TO BE BOUND TO THESE TERMS AND CONDITIONS. IF YOU DO NOT AGREE TO ANY OF THE TERMS OR CONDITIONS PROVIDED HEREIN, PLEASE DO NOT USE THIS WEBSITE OR ANY INFORMATION OR TOOLS HEREIN.

3.1. Unidentified Users

According to this workflow *unidentified users* are able to consult those parts of the EU RD Platform that do not require authentication or verification. This means that they have access to the ERDRI.dor registry list of all registries or search results in ERDRI.dor but with limited information about each registry. This information is accessible by clicking on the "Browse anonymously" button as indicated in figure 3. Users wishing to consult full details of these registries can do so by becoming "authenticated users" (Section 3.2. of this document).

3.2. Authenticated Users

A user wishing to consult ERDRI.dor for the list of registries and full description of these registries or a single registry and ERDRI.mdr for browsing the existing registry metadata (*reader/user*) and ERDRI.mdr collection of meta data from the participating registries.

To become an authenticated user you need to have an EU login account. You will be asked to enter your EU login credentials as indicated in figure 4.

3.3. Verified Users

Verified Users are those contributing with information about their registries. They will be able to insert registry information in ERDRI.dor and the meta data information of their registry into ERDRI.mdr (please consult <u>ERDRI.dor</u> and <u>ERDRI.mdr</u> User Documentation for instructions on how to use these tools).

Furthermore, access to the pseudonymisation tool is granted only to authorised and verified users whose registries have already completed their entries in ERDRI.dor (descriptive data) and ERDRI.mdr (metadata). More than one verified user request access to the pseudonymisation tool per registry.
